

About Us:

“We delight in the beauty of butterfly, but rarely admit the changes it has gone through to achieve that beauty.” - Maya Angelou

To us, whether it is home, industrial or commercial space, beauty surmounts to the space you live & work. Your dream happens only when space carries the legacy of making it a reality.

Having enriched experiences of 33+ years, Balaji Corporation Group figures out aspirations of Industrial, Commercial & Decorative Projects, approaches them with the right solutions, and applies the accurate method effectively with the efficient team.

Gaining in-depth knowledge about client's needs and the market over the years, we serve the customized solutions in the market for reconstruction or improvement projects.

Our Vision:

Leading the market with in-depth knowledge and experiences turning into reality, Balaji Corporation envisions strong reach PAN India with trustworthy and reliable service adding to the quality of the variant projects.

Our Mission:

Our mission is to grow high to serve market demand with quality and value addition services.

Our Services Outline:

Presently, our strong reach is in Gujarat, Maharashtra and Madhya Pradesh.

1. Painting- Industrial, Commercial and Decorative Projects
2. Roof Sheeting
3. Erection and Fabrication
4. Civil Construction
5. FRP (Fibre Glass Reinforced Plastic)
6. Water Proofing
7. Man Power Supply
8. Turnkey Project
9. Trading Industrial Paint
10. Floor Coating Specialist

Dealing into other segments:

11. Trading Cotton Waste

Key Drivers of Our Services:

A. Professionalism

B. Reliability

C. Safety and Assurance

A. Professionalism:

- We do take care of the constraints of the project i.e. Time of the project, Scope of the applicable methods and Budget of the entire process with duration.

B. Reliability:

- With a reliable team, we meticulously count the time and cost of the required project. Hence, we undertake the projects in a well-organized and planned way after giving you the right quote.
- Also, there will be a quick response to any contingencies if chances prevail on the site.

C. Safety and Assurance:

- Taking care of safety guidelines and procedures, we train our staff for the appropriate usage of the products in a responsible way. The team takes utmost care for the removal of hazardous products and disposes of the materials ensuring safety on the site.
- We **guarantee** our services which include workmanship. However, the guarantee for the products will be accountable according to the given manufacturer specifications.

Expert Precision:

With the increasing industrial demand for abrasive blasting and industrial painting, our team initiates the following steps:

- Planning
- Roles Distribution
- Method Selection
- Resources Allocation
- Safe Working Practices
- Standardized Service
- Technical Support
- Quality Control
- Quality Assurance
- Accurate Results

Our Services:

A. **Painting and Decorating:**

Our services for Residential, Commercial and Industrial Coatings are highly demanded in the market which includes primary services such as Interior and Exterior Priming and Painting.

- Applying colors properly on a surface with effective tools helps industries to save electricity consumption.
- Based on industry background, we provide a compatible quote for the exterior surface painting.

B. **Pipeline Painting:**

For heavy industries, the pipeline is a serious responsibility to be protected from corrosion and other concerns such as wrong coating and lining.

Established in the Paint Industry as a trustworthy old group across the states, we deal precisely with the interior and exterior pipeline painting [note: in different temperature levels] which involves heavy duty epoxy and polyurethane coatings.

Our major responsibilities here are:

- (a) Selecting the right materials to keep the pipeline smoothly functioning.
- (b) Applying the right tools and equipment.
- (c) Ensuring the safety on-site and health safety of the team as well.
- (d) Safety Certifications.
- (e) Coatings protection from an environmental outbreak.

- (f) Our experience of more than decades helps us to carefully deal with the right choice of coatings. We do keep in mind the manufacturing processes occurring in the Pipeline i.e. [Successful Hydraulic Fracking](#) or [Hydraulic Fracturing](#).

Thus, hereby we help industries by making their Annual Maintenance of Pipeline safe and easy.

C. Staining and Varnishing:

To maintain a lively, sleek and polished look, staining and varnishing become an essential priority.

Whether the given surface is grit, scrape, or plane, our trained staff actively gets their jobs done with:

- a. Analyzing the area first,
- b. Countering the imperfections with putty,
- c. Acknowledges wood species,
- d. Using up a wide range of products such as finishes, wax, shellac, oils, paint and lacquer and
- e. Polishing accordingly for the final results.

D. High-Pressure Washing and Power Cleaning:

Whether it is to bring light on the finishes or to clean off the mold or dirt from the surfaces; our team, well trained in altering & handling the nozzle for proper [spray painting](#) changes the entire look pleasant and new.

E. **Plant Shutdowns Color Coatings:**

To protect machinery from corrosion and other dirt absorption, color coatings add longer life to the machinery.

We use **Epoxy Coatings** that fully protect from adverse effects of abrasion, turbulence, corrosive fluids and an extreme temperature thereby enhances the long life of the heavy industrial machinery.

For **Carbon Steel Tanks**, even if it is outside the premises, Epoxy color coatings last for (approx.) 5 Years.

F. **Heavy Industrial Chimney Painting:**

Industrial Chimneys and Smokestacks are vulnerable to changing weather and corrosion. Hence, it's a high-end responsibility to be fulfilled with special teamwork.

With the experiences of more than decades in Chimney Painting Segment, there has been always a guaranteed success ratio with our services.

We understand well the tensile strength and paint resilient properties in different temperatures and therefore benchmarked the Paint Industry with 100% proven results.

“Do the hard jobs first. The easy jobs will take care of themselves.”

~ Dale Carnegie

Our Services benchmarking the Industry Standards with proven results are:

1. Drywall Patch and Repair
2. Wall Plaster Repair
3. Repair Holes on Drywall & Water Damage
4. Surface Moles and Rots protection
5. Ceiling Texture Repair
6. Popcorn Ceiling Removal with Scraper or Repair with aerosol sprays
7. Insurance Repairs
8. Remodel, Entire Renovation, or Addition
9. Drywall Texturing and Drywall Painting
10. Spray Textures
11. Self Levelling - Epoxy Floor Coating
12. Polished Concrete Coatings

Wall Painting Techniques:

'Add beauty to the wall finishes with wall painting techniques.'

The colors on the wall add liveliness to the rooms or spaces you live or work.

With two important painting techniques, you can truly rejoice 'colors selection decision' for your walls.

With your favorites, our team applies your chosen colors with great enthusiasm. And thus, the resolution we come across, as a result, makes you and our team, both of us happy.

Today, [Glazing Techniques and Accent Techniques](#) are the two significant techniques that offer you a wide range of choices to select the color and get the beauty radiated on walls with endless arrays of patterns and effects.

You can have unique or antique effect applying on your walls with [Glazing Technique Methods](#) such as Ragging or Sponging On-Off, Frottage (Parchment), Stripes Textures and Venetian Plaster (a strong compilation of lime or gypsum) giving long-lasting marble or polished finishes to the walls.

On the contrary, with the knowledge of differences of mix in the Metallic Paint Method and Pearlescent Method, [Accent](#)

Technique Method becomes the most recommendable one to have a glittery shimmer effect on the walls.

FRP Coating:

(Fibre Reinforced Polymer or Fibre Reinforced Plastic) are complex components stronger in terms of strength, lighter in terms of weight, and used in a modular structure with a seismic upgrade.

We offer FRP Coatings Professional Services to our noteworthy clients to meet their specific demand. Whereas, our scope of application lies in FRP water tanks, Concrete Floor and Roof Coatings, Treatment Plant Isolation, Acid Ground FRP Overlays, etc.

Furthermore, Balaji Corporation operates well the **Industrial and Commercial Roof resurfacing and seals** that inevitably take care of your building possessing the valuable inventories or employees and laborers employed over that space.

Our reach to the distinct Industrial Sectors:

Food

Chemicals

Steel

Electronics

Pharmaceuticals

Auto

Textiles

Glass

Rubber

Our Team of Experts. Build-to-order services. Exemplary Results.

With efficient methods, effective tools and equipment, time and budget analysis, etc. our team undertake the project of heavy construction industries with the services such as:

- Structural Steel Erection.
- Tower and Stack Construction.
- Foundation Construction.
- Pile Driving.
- Foundation Drilling.
- Stabilization.
- Demolition and Movement of Modular Structure.
- Clearing, Grubbing, Snagging and Rip Rap Process.
- Slip from Concrete Structures

However, **Structural Steel Erection** has matrices of experts' services which we count as two main operational parts:

A. Key Services outlining the Structures.

B. Services in various phases.

A. Key Services outlining the Structures:

a. Layouts b. Pre-cambering of trusses c. De propping procedures d. Structural geometry e. Leveling and alignment f. Tolerances g. Plant & equipment h. Bolting and welding i. Principles of erection j. Requirements of scaffolding k. Risk analysis and safety measures l. logistics and erection sequences.

B. Our Services in various phases:

a. Planning and analysis b. design c. fabrication d. transportation e. planning for construction f. erection

Standardized Services of Expert Team for Renovation and Expansion:

For the conventionally built structure such as office buildings or warehouses, our cross-functional expert team sensibly works on volumetric components or substantial elements of the building.

Using the design of the expansion or renovating the firm or warehouses entirely new, we follow the mandatory codes and standards to get the project completed on time.

Balaji Team Replacement Services:

Our smart and hardworking acumens are highly irreplaceable for their specialization of replacing all types of metal and flat roofs.

Withstanding the notorious services of our team, we offer a variety of choices to our clients with the types of replacement they want.

1. BUR- Built-Up Roof:

For buildings having low slope or level roofs, the BUR method is the inexpensive choice popular for more than 100 years in the US. With the final layer of stone or gravel, you can choose the number for other layers to be installed with the final one.

2. Modified Bitumen:

The trend of technological up-gradation has also led to the advancement in roofing membranes from that traditional BUR.

This roofing membrane is known for its exceptional aging properties and water barrier capacity.

3. PVC Membrane:

Being a trusted membrane of the decades, Polyvinyl Chloride Membrane is a strongly recommended choice

to avail waterproof and UV resistant property benefits for a longer span.

4. Single Ply EPDM:

EPDM- Ethylene Propylene Diene terpolymer is the best choice for extreme conditions along with prohibiting the dirt and growth of moss over it.

5. Spray Applied Roof Coatings:

Generally, silicone-applied roof coatings are the single component moisture curing coatings that take lesser time to install for commercial buildings. Depending on the roof layout and specific situation we build up extremely sustainable Spray Applied Roof Coatings.

Our Expert Team Services Coverage in Civil – Concrete Construction, Concrete Slab & Foundation and Land Leveling Projects:

- New Construction of Office Buildings
- Medical Facilities
- Government Leased Properties
- Tenant Improvements
- Flat Roof Membrane System
- Commercial Single Roofs
- Civil- Concrete Construction Projects
- Concrete Slab Foundation
- Interior Renovation

Clients Testimony:

“Having had experienced years serving the industrial, commercial and residential projects, it’s a true satisfaction for us to hand over our concerns to Balaji Corporation Group.

What makes us happy for their services that they are always determined to the commitment made with us for timely completion and quality control at all stages. This can be seen over the years with the guarantee they give over the materials used and workmanship offered. Truly Appreciable!”
